## Melanoma Awareness Month

With over 5 million cases diagnosed in the United States each year, skin cancer is the most common cancer in the United States. Fortunately, skin cancer is also one of the most preventable forms of cancer. About 90 percent of non-melanoma skin cancers and 85 percent of melanoma cases are associated with exposure to ultraviolet radiation from the sun. By encouraging sun-safe habits, we can change behaviors and save lives.

THE SKIN CARE MAKEUP®

PurePressed® Base Mineral Foundation

*25% off*

- A pressed mineral foundation that is slightly more sheer and matte than the loose powders.
- Made from micronized minerals, oil free and weightless.
- An SPF foundation, powder and concealer with broad spectrum (UVA/UVB) sun protection. Either SPF 20 or SPF 15 depending on shade.
- Water resistant to 40 minutes.
- Contains antioxidants such as Pine Bark Extract and Pomegranate Extract (a potent antioxidant that helps fight free radical production caused by sun exposure).

Buy **ONE**, Get **ONE** 50% off

- EltaMD® sunscreens help prevent sunburn and decrease the risk of skin cancer and early skin aging caused by the sun, when used with other sun protection measures.
- EltaMD® sunscreens are formulated with transparent zinc oxide and are noncomedogenic, sensitivity-free, fragrance-free and paraben-free.
- All EltaMD® sunscreens are recommended by The Skin Cancer Foundation as effective broad-spectrum sunscreens.
